### **AR 03**

CONSTITUTION: water emulsion of acrylic copolymers

APPEARANCE: dull liquid

pH: 5,0-7,0

CHARACTER: anionic

SOLID CONTENT: 34-36%

### **METHOD OF USE**

**AR 03** is a very fine water emulsion. The particle diameter is very small therefore **AR 03** is suitable also for impregnation and for those skins having scarce absorbing power.

Its film is transparent and brilliant and has a good elasticity.

**AR 03** has a good fastness to solvents and water and has also a good mechanical stability. Thanks to these characteristics **AR 03** is largely used in the soft leathers and even in garment nappa.
