

IDIV

AR 36/I

Appearance	light brown liquid
Constitution	acrylic resin
Character	anionic
Active substance	20%
pH	7-8

Method of use

AR 36/I is a very fine acrylic resin used for impregnation of full grain leather.

Its film is soft and it can be used in combination with penetrators of **IDIV's** line **PT 01** and **PT 02**. But thanks to its particular character often the penetration speed is high enough without the necessity to use penetrator.

Skins impregnated with **AR 36/I** maintain their original softness.
