## AR 60

<b>Constitution</b>	copolymer in water solution
<b>Appearance</b>	clear liquid
<b>pH</b>	8.5-9.5
<b>Character</b>	anionic
<b>Active substance</b>	20% app.

### Method of use

**AR 60** is a very fine and soft acrylic copolymer, practically colourless.

**AR 60** has an excellent penetrating power and remarkable capability of adhesion and filling.

If it is used as impregnating agent it is advised to use it with **PT 01** or **PT 02**, penetrators of good effectiveness.

On the contrary if it is used as bottom binder it is advised to use it in combination with a soft polyurethane like **UR 14** and casein binder like **BI 001**.

**AR 60** is dilutable in any ratio with water as well as with polar solvents like ethylglycol, methylglycol, isopropyl alcohol and so on.

Thanks to its good characteristics, **AR 60** can be used in combination with resins of remarkable filling power but scarce penetrating power.

**AR 60** is an excellent levelling pre bottom on buffed hides.

edition 07/2001
