

IDIV

BI 23/P

Constitution	polyamide based binder
Appearance	liquid of light brown colour
pH	7.7-8.7
Character	anionic
Active substance	22% app.

Method of use

BI 23/P is a medium hard binder forming a transparent and brilliant film that is at the same time flexible.

BI 23/P is dilutable in any proportion with water and is compatible with all the chemicals having the same character.

Thanks to its chemical nature, it has very good physical characteristics as well as dry and wet rub fastness.

BI 23/P is a binder of general use: it can be used in the ground and in the top, in the resin and casein finish. It is perfectly glazeable and polishable and if 1-1.5% of catalyst is added in the solution, the wet and dry rub fastness becomes excellent.
