

# IDIV

## CB 62

<b>Constitution</b>	proteic binder
<b>Appearance</b>	viscous liquid
<b>pH</b>	7.5-8.5
<b>Active substance</b>	13.5-14%
<b>Character</b>	anionic

### Method of use

**CB 62** is a hard binder with remarkable characteristics of glossy and brilliancy. It is particularly used in the tops and is perfectly glazeable and polishable.

**CB 62** can be used in the tops with little quantity of **BI 001** acting in this case like a plasticizer. For example in one liter solution grs 300 of **CB 62** and grs 25 of **BI 001**.

**CB 62** is used with success also in the plate finish every time a high and permanent gloss is required.

**CB 62** can be used with all chemicals of **IDIV's** line having the same or non ionic character.

edition 07/2001
