

# IDIV

## FI 06

<b>Constitution</b>	filler in water dispersion
<b>Appearance</b>	paste of cream colour
<b>pH</b>	9-10
<b>Active substance</b>	24% app.
<b>Reaction</b>	anionic

### Method of use

**FI 06** is a filler to be added to the resins in the grounds also in the case of very soft leather.

In combination with acrylic resins of **IDIV's** line, **FI 06** improves the covering and the embossing, reducing at the same time the stickiness at the plate and at the piling.

The softness of **FI 06** improves the action of dry drumming making it suitable also for nappa that maintains a natural look.

The quantity to be used is in the range of 100-300 grams/liter.

edition 07/2001
