

IDIV

FIL 42

Appearance	clear colourless liquid
Constitution	polysiloxane in solvent
Active substance	100%

Method of use

FIL 42 is a touch modifier that can be used either in solvent or in water system compatible with butyl glycole and other polar solvent.

Therefore **FIL 42** is suitable for nitrolaquers and nitroemulsions as well as for resin finishing, compatible with polar solvent, where it modifies the plastic touch conferring the leather a soft and a little slippery hand.

Furthermore thanks to its characteristics **FIL 42** improves the plating operation reducing the stickness of the resin finish.

Quantity to be used can be in the range of 10-50 grs per liter of solution.
