

IDIV

SYN 75

Appearance	slightly yellowish transparent liquid
Constitution	synthetic tanning agent
Character	anionic
pH	5.3-6.3 (solution 1.10)
Active substance	32% app.

Method of use

SYN 75 is an acrylic syntan of general use. Dilutable in any ratio with water **SYN 75** has many appreciable characteristics:

- It can be used in the retanning of veg and chrome skins. Suggested quantity is 3-5% on shaved weight;
- It is stable in pH range between 2 and 9;
- It can be used in the neutralization of chrome bath, thanks to its affinity to chrome complex. Quantity to be used is 4-5% on the shaved weight at 40-50°C;
- It confers to the skins roundness and fullness.

The use of **SYN 75** in the neutralization has several advantages as:

1. A complete neutralization together with a good fullness of the leather and a more flat grain;
2. A uniform dyeing;
3. In the case of a further addition of chrome usually there is no need of neutralization.
