## SYN RB

<b>Constitution</b>	acrylic-synton complex
<b>Appearance</b>	white liquid
<b>pH</b>	5-6.5
<b>Character</b>	anionic
<b>Active substance</b>	40% app.

### Method of use

**SYN RB** is a retanning agent dilutable in water in any proportion. Its composition makes it particularly suitable for small skins. Skins processed with **SYN RB** have a good firmness and roundness and are perfectly glazeable and polishable.

The use of **SYN RB** is advised any time if there are problems of grain firmness. This problem is solved by using **SYN RB**.

The quantity suggested is between 3-5% and **SYN RB** can be added either before the fatliquoring or after. A run of 30' is sufficient for the penetration of **SYN RB** into the skin.
