

IDIV

SYN SM

Constitution	polymeric syntan
Appearance	clear liquid
pH	7.4-8
Active substance	15-16%
Character	anionic

Method of use

SYN SM is a polymeric syntan perfectly soluble in water and compatible with weak alkaline substances and acids.

SYN SM confers to the skins fullness and roundness improving the tear fastness.

Skins retanned with **SYN SM** have fine, smooth and rather firm grain which is easy to buff.

SYN SM can be used in neutralising or in retanning. It is better to add **SYN SM** alone, run 20 - 30', then add the other syntans or veg extracts.

Quantity to be used can vary between 2-6% on the shaved weight.
