

IDIV

UR 10

| | |
|-------------------------|---------------------------------|
| Appearance | white liquid |
| Active substance | 34-35% |
| Constitution | based on aliphatic polyurethane |
| Character | anionic |
| pH | 7.7-8.5 |

Method of use

UR 10 is dilutable in any proportion in water. **UR 10** has been studied overall for full grain leather and is particularly suitable for the bottom coat. The mechanical characteristics of the leather processed with **UR 10** improves remarkably.

UR 10 doesn't contain any solvent and its film is flexible and light fast.

Thanks to its characteristics **UR 10** can be kept as a multi-purpose binder suitable for full grain and embossed leather. It can be employed also on split where it can be given by roll coating machine.
