

IDIV

UR 105/A

Appearance	slightly opalescent liquid of yellow colour
Constitution	aromatic polyurethane
Character	anionic
Active substance	20%
pH	7.5-8.5

Method of use

UR 105/A is a finely dispersed aromatic polyurethane that gives a very soft film not light fast.

UR 105/A is used as an adhesion promoter especially in those cases like water proof or greasy leather where it is almost impossible to get an appreciable adhesion using the aliphatic polyurethanes.

In certain applications it is also advisable to add a penetrator in order to get a better penetration of the polyurethane into the skin.
