

IDIV

UR 33/B

Appearance	white liquid
Constitution	aliphatic polyurethane in water dispersion
Active substance	37% app.
pH	7.0-8.0
Character	anionic

Method of use

UR 33/B is a very versatile polyurethane binder that can be used both in the ground and in the top coats. Its dispersion is very fine.

UR 33/B film is transparent, medium soft, not sticky with extraordinary mechanical characteristics. It is also solvent fast. But it is advised to test this fastness with the solvent to be used. Also the water resistance is remarkable.

UR 33/B levelling on the leather is excellent as well as the covering.

It can be cross linked using **TOP 7** and the mechanical fastness especially the wet rub, becomes remarkable.

UR 33/B can be used for all kinds of leather both full and corrected grain.
