

# IDIV

# UR 84

<b>Appearance</b>	opalescent liquid
<b>Constitution</b>	aliphatic polyurethane
<b>Active substance</b>	20-21%
<b>Character</b>	anionic
<b>pH</b>	7.5-9.0

### Method of use

**UR 84** forms a medium hard film of remarkably gloss and for this reason it is particularly suitable for tops. In this application it is suggested to use it in combination with **BI 23/P** in order to make the touch more gentle without effecting the gloss and the fastness.

If higher resistances are requested the use of **TOP 7** together with **UR 84** and **BI 23/P** is recommended.
