

IDIV

WX 44/CO

Constitution	compound based on waxes and oils
Appearance	yellowish viscous liquid
pH	7.5–8.5
Character	anionic
Solid content	75% app.

Method of use

WX 44/CO is a compound suitable for pull-up effect especially on veg heavily retanned leather and it can be used sometimes for burnish finish. It is completely dilutable in the water.

One of the best feature of **WX 44/CO** is the not darkening of defects therefore its use is especially advisable on pastel colours.

WX 44/CO used in the grounds seals very well the leather and therefore attention is to be paid to the adhesion of next coat.

WX 44/CO can be applied by roller coating machine and the quantity can be in the range of grs/sqf 8-10. Rest overnight and plating next morning.

To obtain good pull up effect on buffed leather, the advised procedure is to give two passages with roller coating machine with intermediate sand blast.
