

# IDIV

## WX 50

<b>Appearance</b>	white-cream liquid
<b>Constitution</b>	emulsion of natural and syntetic wax
<b>pH</b>	9-10
<b>Character</b>	anionic

### Method of use

**WX 50** is dilutable in any ratio in water and has the property to confer the skin a waxy and smooth touch without affecting the grain.

**WX 50** is compatible with the **IDIV's** line of binders having the same anionic character. The advised quantity is grs 50-80 per liter of solution especially in the nappa for garment finishing.

But it can be employed with good result also in the pigmented finish to improve the plastic touch of the resin binders.

Using **WX 50** the action of the plate is improved because it allows a better uniformity and equalization of the finishing.
